WHO we are?

About us

Supanova Energy Services Limited (SESL) has an established Health, Safety and Environment (HSE) Management system developed in line with international Safety Standards and Codes

Supernova Energy Services Limited (SESL) from our humble beginning of providing pipeline and facility integrity management and ancillary services we have metamorphosis into an **Engineering, Procurement, Construction, Commissioning and Maintenance Company (EPCCM)** strategically position to deliver world class services to our client in Oil, Gas and Energy Industries.

We are set up to provide a focused approach to the industries needs by providing innovative solutions for your project; from conception to commissioning and throughout the life time of the plant, leveraging our global network and working alongside industry experts across disciplines and market to deliver our services in an economically way for value addition to big and small corporation.

OUR CORE SERVICES: –

* Engineering Design
* Procurement
* Construction and Installation
* Pre-commissioning and Commissioning Services
* Maintenance
* Pipeline and Process integrity Management
* Electrical and Instrumentation
* Project Management

Our Strength

Our strength is in our ability to deliver consistent quality services to our client through application of latest technology, equipment and well-trained personnel.

Our Mission

Our mission is to be adaptable to Our Customer at every stage they are in their growth path.

Our Core Values

- Professional Service
- Consistent performance
- Innovation

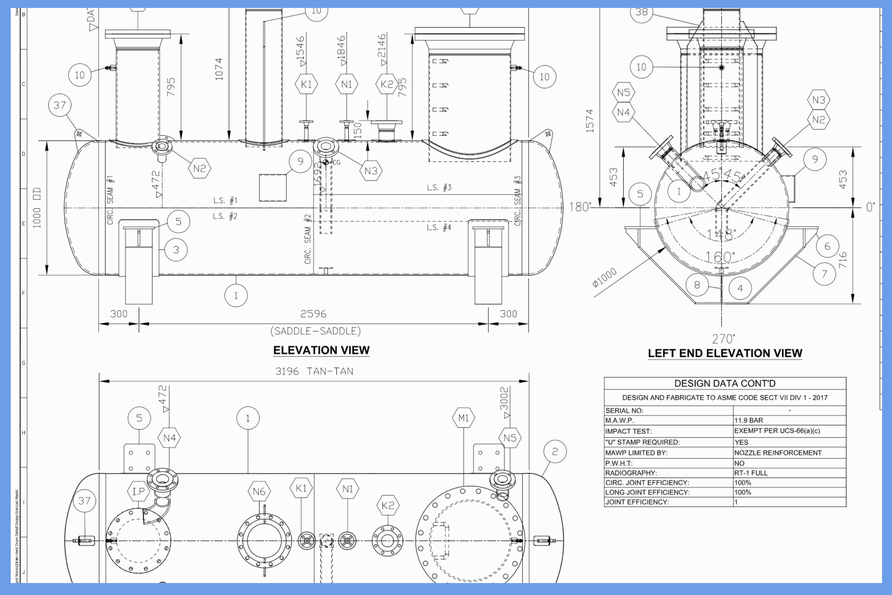
Our Sevices



Engineering Design

Our engineering services cover the following:

* Front-End Engineering & Design (FEED)
* Pipeline engineering
* Process engineering design
* Electrical and Instrumentation engineering design
* Process engineering and process modelling
* Construction-driven engineering design execution
* Detailed Engineering Design (DED)
* Design reviews
* Value engineering
* Cost and schedule estimation
* Subsea production engineering

Procurement

Our procurement services cover the following:

* Procurement & Effective Supply Chain Management
* Strategic Sourcing solutions for oil and gas Equipment, Machinery, Electrical & Instruments items, Tools etc.
* Requisition/Ordering Technical Support
* Network of International OEM's/Suppliers
* Quality Inspection & Control / Surveillance
* Inventory management & advisory services
* Logistics and Transport & Distribution
* Procurement Audit
* Warehouse Management Solutions

Construction and Installation

Construction and Installation activities covers:

* Offshore Installation & Hook-ups
* Fabrication - Structures, piping & special pipeline item
* Production Decks & Modules
* Corrosion control – Blasting and Painting
* Scaffolding design system software and erection
* Pressure Habitat Welding
* Rope access
* Bolt Tightening, Tensioning & Torqueing
* Rigging Design, Planning & Operation

Pipeline & Process Integrity Assessment

Our Integrity Assessment service includes:

* Corrosion monitoring
* Routing pigging
* Pipeline In-Line Inspection (ILI)
* Ultrasonic testing
* Umbilical Testing
* Fiber optics testing

Maintenance Services

Our procurement services cover the outlined details: –

* Engine overhaul
* Supply of Maintenance Manpower Services
* Full Plant Integrated Maintenance
* Fabric Maintenance Services
* On-site Machining
* Hydro-jetting, cleaning, and painting
* Hot bolting
* Condition Monitoring
* Compressor maintenance

Pre-Commissioning & Commissioning Services

Our pre-commissioning and commissioning (PC&C) services and management includes:

* Lube oil flushing
* Nitrogen Purging and drying
* Chemical Cleaning
* Leak Detection
* Functional Testing and SIF Testing

Electrical & Instrumentation Engineering Solutions

Our E&I Engineering solutions is managed under 5 major sections

* Instrumentation
* Remote Monitoring
* Control Systems
* Electrical Systems
* Training and Consultancy

Project Management

Our project management specialization areas include: -

* Governance – Business Level Control to Projects
* Planning – Project's Outcomes, Schedule Goals and Objectives
* Resource Allocation – People, Money, and Scheduling
* Communication – Communicating Project Plans and Status
